As the roof is usually the largest surface area of a house, choosing the right roofing material to suit the location and style of your home is central to maintaining its good looks and value.

Midland Brick’s extensive range of roof tile colours and profiles allows homeowners to achieve long lasting good looks, plus flexibility in design to suit a wide range of architectural styles and specifications.

All Midland Brick terracotta and ceramic roof tiles are salt-safe and frost-resistant, making them particularly suitable for homes built in coastal locations. Additionally, we believe premium products should come with a premium guarantee, which is why our Terracotta and Designer Ceramic ranges come with a 50-year and 60-year guarantee respectively.

Quality and style that can’t be denied.
French: Eclipse
Why choose roof tiles?

### Designer Ceramic Tiles

<table>
<thead>
<tr>
<th>Feature</th>

Features of our roof tiles

- **DESIGN FLEXIBILITY**
  The extensive range and unique design of individual tile profiles mean enhanced flexibility in roof design to complement a wide range of architectural styles and specifications. Our Terracotta and Designer Ceramic ranges offer solutions for all aesthetics preferences and surface finish requirements.

- **THERMAL PERFORMANCE**
  Roof tiles can help you enjoy more comfortable living in summer and winter. The thermal mass of clay, when used correctly, can result in improved insulation properties, in addition to considerations such as sarking and overall solar design.

- **ACOUSTIC PERFORMANCE**
  The density of roof tiles helps reduce external sound such as aircraft and road noise and, particularly, rain and hail.

- **LOW MAINTENANCE**
  Once roof tiles are installed, there is little maintenance required as they don't rust or corrode. Should a section of the roof ever be damaged, there is the added advantage of individual tile replacement.

- **FIRE RESISTANCE**
  Terracotta and ceramic roof tiles are made from non-combustible materials and can safely be used in bushfire prone areas, including the highest prone areas (BAL-FZ), when installed to Australian Standards.

- **SALT-SAFE & FROST RESISTANT**
  Terracotta and ceramic roof tiles are salt-safe and frost-resistant, making them suitable for any location, including harsh marine areas.

- **WIND RESISTANCE**
  The weight of the roofing material itself impacts performance in high wind areas. The dead load of roof tiles reduces the impact of uplift pressures in comparison to lighter-weight materials.¹

How to choose a roof tile

1 Material

Your choice of material will come down to a personal preference of shape, colour and finish. All our tiles are made to last, with a 60 year guarantee on the Designer Ceramic range, and 50 year guarantee on Classic Terracotta. Some customers prefer the natural beauty and rich, earthy colours of terracotta or the streamlined, modern look of ceramic.

2 Profile

A tile’s profile refers to its shape and design. Midland Brick roof tile profiles range from smooth and flat to having prominent undulations or waves on the surface. Key considerations when choosing a tile profile will be the pitch of your roof as well as its style. Below is a chart to help you choose a tile profile. You will need to determine the pitch of your roof before selection as some tiles require a minimum pitch.

Designer Ceramic Profiles

Shingle
Minimum Pitch:
Without sarking 20°
With sarking 18°

Artline
Minimum Pitch:
Without sarking 20°
With sarking 18°

Wave
Minimum Pitch:
Without sarking 20°
With sarking 18°

Classic Terracotta Profiles

French
Minimum Pitch:
Without sarking 20°
With sarking 15°

Swiss
Minimum Pitch:
Without sarking 20°
With sarking 18°

NOTE:
1. Maximum rafter length at the minimum pitch is 4.5 metres.
2. *To be laid in a cross bond on pitches 20° and lower.

3 Colour & Finish

Midland Brick offers a palette of warm, cool and neutral tones in both its Terracotta and Designer Ceramic ranges.

Not only is there a large assortment of colours on offer, but our roof tiles are also available in different finishes. There are four finishes available in our Terracotta range – extending from matt through to fully glazed – and two finishes available in our Designer Ceramic range – satin and matt.

Accessories

Finish off your new roof the right way with our roofing accessories. Whether you’re after a smooth, streamlined look without steps, or a more classic feel with traditional finials and crests, we have you and your home covered.

Accessories for Designer Ceramic

Accent ridging is a low-line ridge system to enhance tiles. Whether flat or shaped in tile profile, Accent Ridging seamlessly aligns ridge capping end-to-end in one smooth line, without steps.

The accent ridge has been formulated for Designer Ceramic tiles and is an essential part of the overall look. Midland Brick recommends accent ridges to be used on all roofs using Designer Ceramic tiles.

Accessories for Classic Terracotta

Depending on the style of your house and design of the roof, Midland Brick offers other ways to finish off ridges and apexes as well as some traditional crests and finials.

Extra Protection

Sarking

Sarking is a reflective foil that is recommended for all tiled roofs. Sarking improves thermal efficiency by reducing the need for heating and cooling devices. It also helps keep moisture out by acting like a second skin. Sarking assists by moving any moisture into the gutters and helps protect the home interior. Sarking must be installed before the tiles are placed on the roof.

Roof Vents

In summer the roof space absorbs and stores heat when it is least needed. Roof vents improve thermal efficiencies by purging hot air and reduces the need for cooling devices.

Installation

To be sure your roof is installed to Midland Brick’s specifications, we recommend choosing an established installer from the Midland Brick installer network.

For more information on new homes, renovations, extensions and re-roofing projects, or for a referral to an installer near you call Midland Brick 13 15 40.
A contemporary take on a much-loved minimalist classic, our state-of-the-art Shingle tiles offer an exclusive look with their smooth, refined finish.
With subtly incised furrows to play with light and shadow, our Designer Ceramic Artline tiles offer a minimalist texture to complement a modern home.
Designer Ceramic Wave

Offering both design flexibility and the richest texture in our Designer Ceramic range, the Wave features undulating, rhythmic lines that are bound to mesmerise.
Meaning ‘baked earth’ in Italian, terracotta, as the name suggests, is a natural clay product that has been used throughout the ages for protection against the elements. Midland Brick’s French Terracotta profile adds a nostalgic warmth to modern living.
Swiss: Ebony
Make a bold design statement with Midland Brick’s Swiss Terracotta profile. With outstanding colour performance and a resistance to harsh UV exposure, terracotta roof tiles are a remarkably well-suited roofing material for the tough Australian climate.

Product information contained in this leaflet is correct at the time of printing however is subject to change without notice. Some photos featured in this brochure are artist’s impressions of how roof tiles will look on a roof. These images are computer generated. Please ensure you view a tile display before making a final decision. Colours shown are indicative only and should not be used for final selection. Colours are subject to change without notice. Check print date prior to product selection. Roof tile colours may vary in shades throughout the manufacturing process therefore it is important that roof tiles are blended consistently across the roof. Midland Brick roof tiles are manufactured and supplied by Boral Roofing, with all tiles being manufactured to the requirements of Australian Standard 2049 Roof tiles. Please ask for a copy of the Boral Roofing guarantees before making your purchase. During transportation and installation small blemishes such as scuffing and chip marks may occur. These are not considered a production fault and will not detract from the performance of the roof tile.
