Planning Your Project

Realising your vision for your home might be easier than you think. Whether you're working with an architect or a designer, hiring an installer, or planning to do it yourself, Cultured Stone® manufactured stone cladding is a great way to bring your dreams to life.

Here are some of the things you'll want to consider as you're planning your project:

Style

Consider the style, size and surroundings of your home. With so many options, there's sure to be a Cultured Stone® cladding stone texture and colour that's the perfect complement.

Texture

Utilising different textures can create a dramatic effect indoors or out. That's why there are so many Cultured Stone® cladding stone options to choose from, including:

Ledge Style

Both rugged and precise, rectangular stone veneers are small in scale and low-relief.

Field Style

Organic in shape and colour, this style creates a rugged, natural look.

Rubble Style

This craggy, informal style is purposely irregular and works well indoors and out.

Random Ashlar Style

Versatile enough to look old fashioned or modern, depending on how it's applied.

Colour

Are you looking for neutral or warm? Vibrant or muted? What about a diverse palette? Cultured Stone® cladding stone is available in a stunning variety of colours. You can even blend two or more textures or colourways to create a distinctive result.

Trim

A selection of Cultured Stone® cladding accessory products are available to put the finishing touch on your project.

Grout

The colour of the mortar you use can have a big impact on the overall look of the project. It can blend with the stone cladding or complement the colourway and make it stand out.

While some Cultured Stone® cladding stone textures are designed to be installed only with or without the standard 12mm mortar joint, others may be installed using a variety of techniques for greater design flexibility.

Among the most popular installation techniques are dry stacked, tight-fitted stone without a mortar joint; standard 12mm mortar joint finished in a variety of ways (e.g., raked, full to face, overgrouted, or various forms of weeping joints); and wide joint, usually full to face or overgrouted.

Cultured Stone® Benefits

Aesthetic appeal

The beauty of stone is now within your reach

Modelled from natural stone and created with painstaking care and artistry, Cultured Stone® achieves the depth, complexity of colour, pattern and unique texture of stone.

With six distinct ranges and a diverse palette of colours, there are numerous options for size, shape, colour and texture, providing the artistic freedom to create a truly personal look.

Cultured Stone® cladding does more than just add beauty to a home.

Versatility

Beauty that enhances any space

Cultured Stone® lets you spend more time creating the look you want, not searching for it. Whether you prefer rugged or refined, subtle or striking, Cultured Stone® cladding is an affordable way to create a look that complements any style.

The natural beauty of Cultured Stone® works in harmony with other building materials such as brick, timber and glass, to create design features with dramatic visual appeal. With a versatility that extends from feature walls to fireplaces, water features to wine cellars, the beauty of Cultured Stone®, both indoors and out, is inspiring.

Sustainable

The natural look of beauty that doesn't cost the earth

At Midland Brick we are committed to developing and improving products that work for tomorrow, not just today.

In all Cultured Stone® products, there is a minimum of 54 per cent recycled content.

Cultured Stone® is engineered to last, maintaining its beauty and strength for at least 50 years*. Furthermore, Cultured Stone® cladding does not require painting, coating or sealing after installation**.

*50 year (limited) warranty. Please refer to the full warranty available at the time of supply.

**See Technical Information Guide for applications prone to smoke, soot, dirt or water splashing.

Cultured Stone® Benefits

Applications

Now it is easier to stand out from the crowd

Cultured Stone® is suited to both commercial and residential applications.

Residential

With Midland Brick's Cultured Stone®, gone are the days of a stone feature being an unattainable dream.

Whether you are looking to dress up the front elevation of your home or make a feature out of your fireplace, and no matter if you are inspired by the earthy feel of a rustic French chalet or the elegance of a mid-century modernist estate, our range of six Cultured Stone® profiles and wide array of colours will help you achieve the result of your dreams.

Commercial

Now it is easier than ever to stand out from the crowd and make an impact on your business by adding definition and differentiation to your look with a Cultured Stone® feature wall.

Thanks to the versatility of Cultured Stone®, you are limited only by your imagination when it comes to creating a custom finish for your business premises. From eye-catching storefronts to high-end restaurants, contemporary hotel lobbies to soothing day spa reception areas, Cultured Stone® adds an air of sophistication and natural beauty unmatched by other materials.

Ease of use

A stone that works for you

Through clever engineering, Cultured Stone® weighs much less than natural stone so it is easier to lift and install on a wider range of surfaces. Cultured Stone® is a great way to highlight design details regardless of the architectural styles you are working with.

Midland Brick can recommend a list of preferred installers who can provide expert advice and a competitive quote.

Cultured Stone® Collection

Stone has been the building block of the family home since civilisation began, from its humble beginnings in prehistoric dwellings to its use as a modern day architectural feature material.

There is no question that stone is loved for its strength, durability and authenticity. It is recognised as a material that adds beauty and character to any space. But despite this, stone can be heavy, difficult to install, expensive and limited in terms of choice.

Midland Brick recognised the opportunity to overcome these issues and has introduced Cultured Stone® to Western Australia. Around for over 60 years in the US market, Cultured Stone® is a manufactured stone cladding product that has all the qualities of traditional stone but with significant added benefits.

Offering a wide variety of colours, shapes and textures, each unit of Cultured Stone® is cast in natural stone moulds and meticulously hand coloured to achieve the look and feel of stone. Cultured Stone® is lighter in weight and affordable, making it a more accessible material for many.

Cultured Stone® claddings come in a wide variety of shapes, colours, sizes and textures to satisfy the most exacting tastes. Each texture is cast in the mold of a natural stone and meticulously hand-coloured to give it a visual authenticity that can't be matched. Whether a project is interior or exterior, commercial or residential, there's a Cultured Stone® cladding solution that's just right.

Dressed Fieldstone

Country Ledgestone

Southern Ledgestone

Pro-Fit™ Alpine Ledgestone

Pro-Fit™ Ledgestone

Country Ledgestone

The extensive palette of installer-friendly Country Ledgestone stone veneer differentiates one Ledgestone from another. It also provides a more subtle blend of colour. For a bolder, more random look, pair with Dressed Fieldstone stone cladding in matching or complementary colours.

White Oak

Echo Ridge

Aspen

Chardonnay

Wolf Creek

Country Ledgestone in Aspen

Pro-Fit™ LedgeStone

A practical way to achieve a custom look. Small-scale, low-relief stone claddings are meticulously bundled together to form modular components of equal heights. The component pieces feature a patented interlocking mortar groove for a secure adhesion without grouted joints.

Southwest Blend

Platinum

Pro-Fit™ Alpine LedgeStone

Pro-Fit™ Alpine LedgeStone stone cladding provides a rustic outdoor look that's easy to install. This precise, rugged ledgeStone texture provides colour and shadow creation for a variety of design opportunities.

Black Mountain

Echo Ridge

Dressed Fieldstone

The rugged look of Dressed Fieldstone stone cladding complements any natural environment. Its rich texture and range of colour enhance a multitude of architectural designs. For a softer look, pair Dressed Fieldstone with Southern LedgeStone stone cladding in matching or complementary colours

Aspen

Chardonnay

Echo Ridge

Blend: Dressed Fieldstone (80%) and Southern LedgeStone (20%) in Chardonnay

Southern LedgeStone

Southern LedgeStone stone cladding offers a rugged and informal appeal with its rough texture and deliberate irregularity. Tight-fitted or mortared, Southern LedgeStone can be used to achieve a number of unique looks.
