

### BLOKSTONE

# Limestone Blocks -P

To aid in the manufacturing process, and to keep more limestone blocks available for customers, occasionally **-P** blocks will be produced.

These blocks meet the same physical properties of original Reconstituted Limestone blocks but can have some different aesthetic appearances. This is usually on the bottom side of the block, which can be hidden or obscured in landscaping uses.

The other sides can still be used as a face side in retaining walls and edges, making this product suitable for many projects.
