

West Side

| Product Information                        | STD WEST SIDE TUMBLED |
|--------------------------------------------|-----------------------|
| Size                                       | 230 x 110 x 76        |
| Dimensional Category                       | DW0                   |
| # Pack                                     | 600                   |
| Approximate Unit Weight (kg)               | 3.4                   |
| Approx Pack Weight                         | 2101                  |
| Approximate Bricks Per m2                  | 48.5                  |
| Mean Unconfined Compressive Strength (MPa) | 12                    |
| CWA                                        | 10                    |
| Core/Void Percentage                       | <30                   |
| Durability Class                           | General Purpose       |
| Potential to Effloresce                    | Nil to Slight         |
| Liability to Lime Pitting                  | Nil to Slight         |
| FRL (min) Single leaf unrendered           | 90                    |

This technical information represents average properties obtained from productions runs. If specific results are required, samples should be taken from current production runs. AS/NZS 4456 and 3700 is used as applicable. Durability classifications are based on product knowledge under local (Perth) climatic conditions. Information subject to change without notice. If you require specific or improved product specification, please contact your Sales Representative.
